“ ARTIFICIAL INTELLIGENCE IN TODAYS WORLD - THE NEXT DIGITAL FRONTIER!!

50%

Of enterprises are spending more per annum on bots and chatbot than traditional mobile apps

70%

Of large enterprises are using AI technologies in 2020

300%

Increase in investment in AI in 2020 compared with 2019

60%

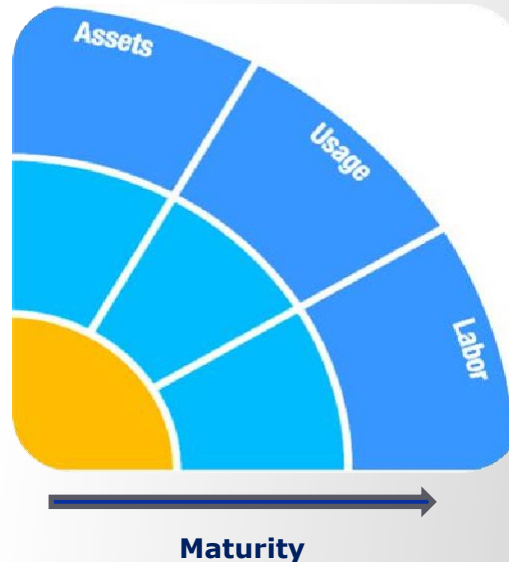

Of Digital Transformation Initiatives Will Be Supported By AI Capabilities by 2020

- AI is expected to increase economic output by **\$13 trillion** in the next decade. According to McKinsey, companies that fully absorb this technology could double their cash flow in that time, while companies that don't could see a 20% decline.
- 84% of C-suite executives believe they must leverage AI to achieve their growth objectives, yet 76% report they struggle with how to scale.
- 3 out of 4 C-suite executives believe that if they don't scale AI in the next five years, they risk going out of business entirely.
- Companies that are strategically scaling AI, report nearly 3X the return from AI investments compared to companies pursuing siloed proof of concepts.

ADAPTION OF AI ACROSS VERTICALS:

AI Adaption is greatest in the sectors/verticals that are already strong digital adopters

| | |
|--------------------------|--|
| High AI adoption | <ul style="list-style-type: none">• Communications• BFSI |
| Medium AI adoption | <ul style="list-style-type: none">• Retail• Auto• Healthcare |
| Low AI adoption | <ul style="list-style-type: none">• Travel• Tourism• Oil & Gas |

Characteristics of Early AI Adopters

- Adapt AI in core activities
- Adapt multiple technologies
- Digitally mature
- Focus on growth over saving
- C-level support for AI
